1. DATA SEND (Send DATA to your PC)

- Connect the input of your MIDI interface to MIDI OUT on the EFX LITE 6M.
- DO NOT plug in power or MIDI IN jack.
- Our recommended MIDI interfaces are the M-Audio USB UNO 1x1 and the iCon MIDI Port 1x1.

These MIDI interfaces are inexpensive and have been tested to be compatible with the EFX LITE 6M.

NOTE

- Some MIDI interfaces can not be used with the EFX LITE 6M. because the MIDI speed is too slow or the MIDI Active Sensing message is transmitted.
- Make sure to install the latest drivers for your MIDI interface before attempting to update the EFX LITE 6M.

Download and install SendSX <u>http://www.bome.com/product/sendsx</u>

Send SX is not free software. After a reasonable trial period, you will be asked to purchase Bome's Send SX to support its development on a voluntary basis. <u>http://www.bome.com/products/sendsx/purchase</u>

- At this moment, the two switches can be released.
- Press the P3 switch to transmit DATA to your PC through the MIDI OUT jack.
